Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 13-14, drawn to an intelligent ink cartridge

Group II, claim(s) 6-12, drawn to a method of manufacturing an intelligent ink cartridge

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in both groups is an ink cartridge comprising a micro-controller and non-volatile memory. This element cannot be the special technical feature under PCT Rule 13.2 because the element is shown in the prior art. US Patent 6473571 B1 to Wegmen et al. teach of a container article filled with tonor (or ink) comprising a signal module that has a central processor including a memory.

Art Unit: 2861
